

Accelerate your Migration to AWS

May 31st 2023

Upendra V , Enterprise Solutions Architect
Ruchi Kapur, Solutions Architect

Agenda

- Migration Tools
- Application Discovery Service
- Migration hub
- Demo

Audience Poll!

What's the primary reason you're attending today's session?

Answer in "POLLS"

Migration tools

MIGRATION AUTOMATION AND GOVERNANCE

AWS Service
Catalog

AWS
Migration Hub

AWS

DATA AND STORAGE TRANSFER

AWS
Datasync

AWS Transfer
for SFTP

AWS
Snowball

AWS Kinesis
Data Firehose

AWS Storage
Gateway

Commonly used migration tools

Service Name	Function	Supported Pattern	Supported Platform	Cutover Downtime	Cost
Application Migration Service	Agent-based block level replication	<ul style="list-style-type: none">• Rehost• Repurchase	Any platform running x86 operating systems	Minutes <ul style="list-style-type: none">• Launch VM• Switch application endpoint	Free* <ul style="list-style-type: none">• EC2 replication server
Server Migration Service (SMS)	Agent-less server migration service	<ul style="list-style-type: none">• Rehost• Repurchase	Virtualization <ul style="list-style-type: none">• VMWare• HyperV• Azure	Minutes/hours <ul style="list-style-type: none">• Launch VM• Switch application endpoint	Free* <ul style="list-style-type: none">• Appliance connector on-prem
Database Migration Service (DMS) & Schema Conversion Tools (SCT)	Database-level replication and Change Data Capture (CDC)	<ul style="list-style-type: none">• Rehost• Replatform	Database Engine <ul style="list-style-type: none">• Oracle• MySQL• SQL Server• MariaDB• PostgreSQL• MongoDB• DB2• SAP ASE• Azure SQL	Minimal <ul style="list-style-type: none">• Switch application endpoint	Free* <ul style="list-style-type: none">• EC2 replication server
VM Import/Export	Import/Export VM image	<ul style="list-style-type: none">• Rehost• Repurchase	Image Format <ul style="list-style-type: none">• OVA• VMDK• VHD/VHDX• Raw Image	Minutes/hours <ul style="list-style-type: none">• Create image• Upload to S3• Launch instance• Switch application endpoint	Free* <ul style="list-style-type: none">• S3 storage

AWS Migration Tools

Application Discovery Service (ADS) & Migration Hub

AWS Application Discovery Service (ADS)

Automate data center application discovery

Identify Application
Inventory

Map Application
Dependencies

Baseline System and
Process Performance

Advantage of ADS

Runs everywhere

- Agent-based discovery
- Agentless discovery

Query discovery data

- Query using Amazon Athena

Streamlines migration planning

- Resource mapping
- TCO estimation

Discover servers in a cost effective manner

Burgeons partner community

- Public API/CLI

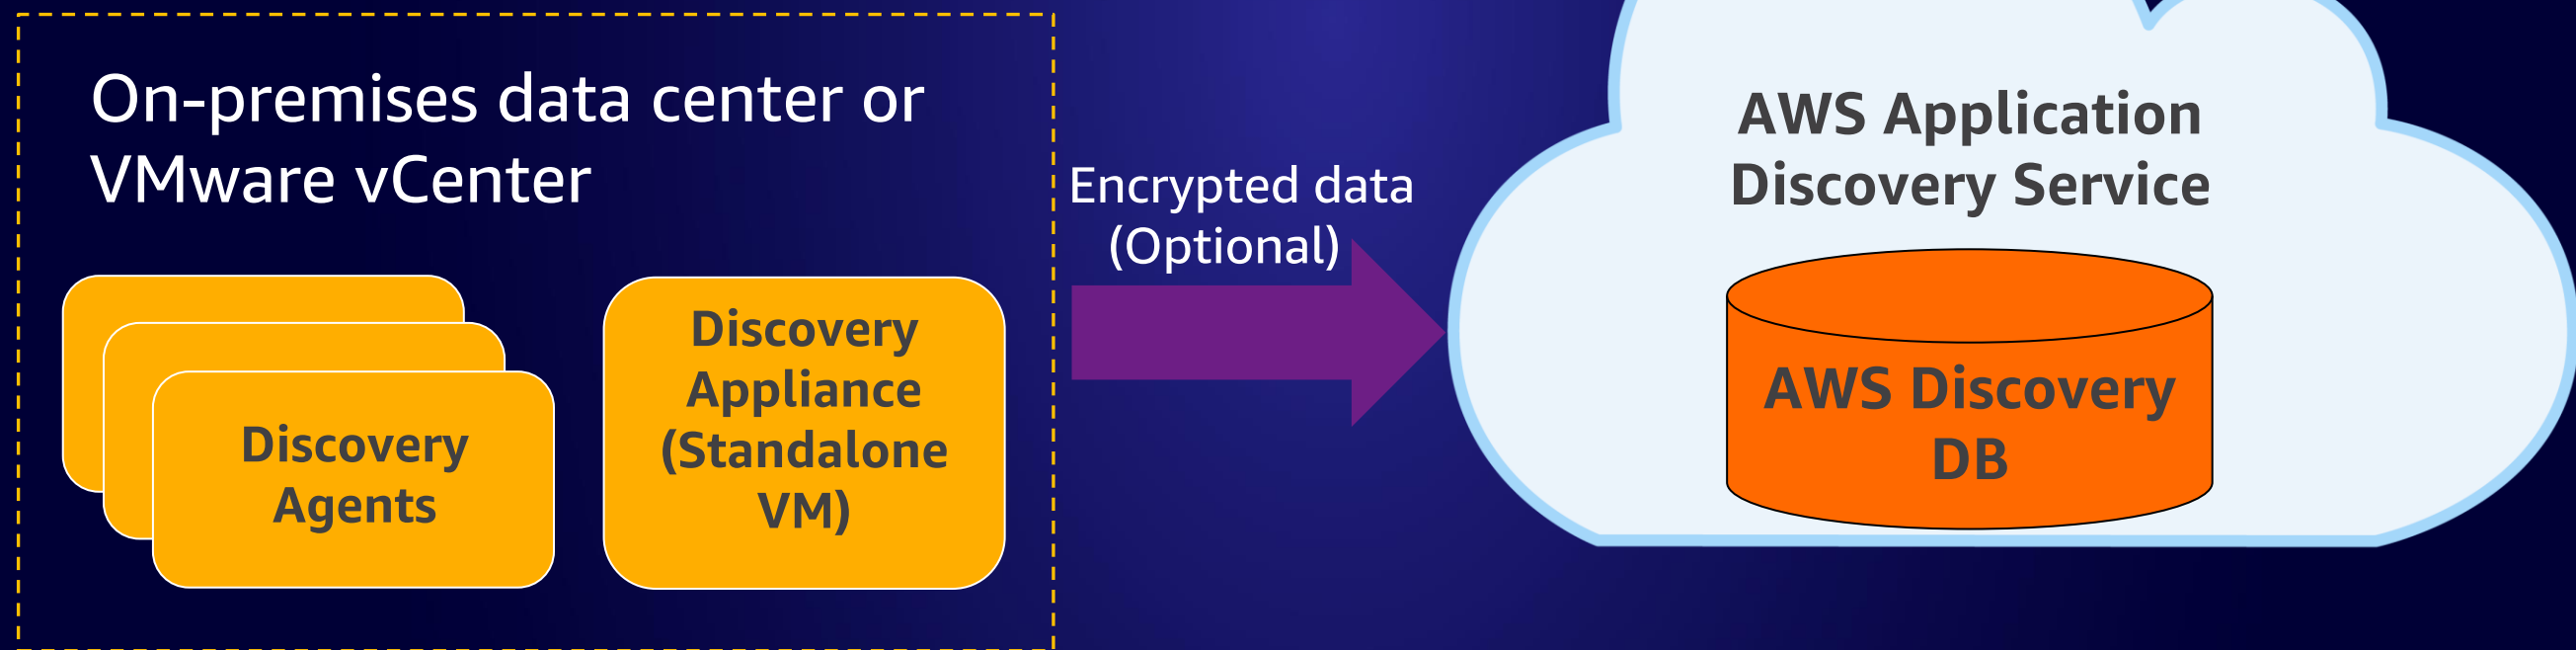

Application awareness

- App identification

AWS Application Discovery Service (ADS)

- Agents deployed on source hosts; agentless for VMWare
 - Windows and Linux support
- Capture system inventory, performance, and dependencies
- Capture and store secured data to AWS
- API access to discovered assets
- Application awareness and identification

Data Capture Capabilities by Agent

- Infrastructure and application level information captured from hosts
- Inventory of installed software applications
- Information about running applications and processes
- System and process performance, and resource utilization
- Track network activity on a server to infer dependencies
 - Dependencies between workloads
 - Dependencies with infrastructure services

Data Captured by the Agent

- User information (username, HomeDir)
- Group information (name)
- List of installed packages
- List of Kernel modules
- All Create and Stop Process events
- DNS queries
- NIC information
- TCP/UDP Process listening ports
- TCPV4/V6 Connections
- Operating System info
- System Performance
- Process Performance

AWS Migration Hub: Simplifying migration

Migration Hub is the central tool
across all phases of migration

Assess

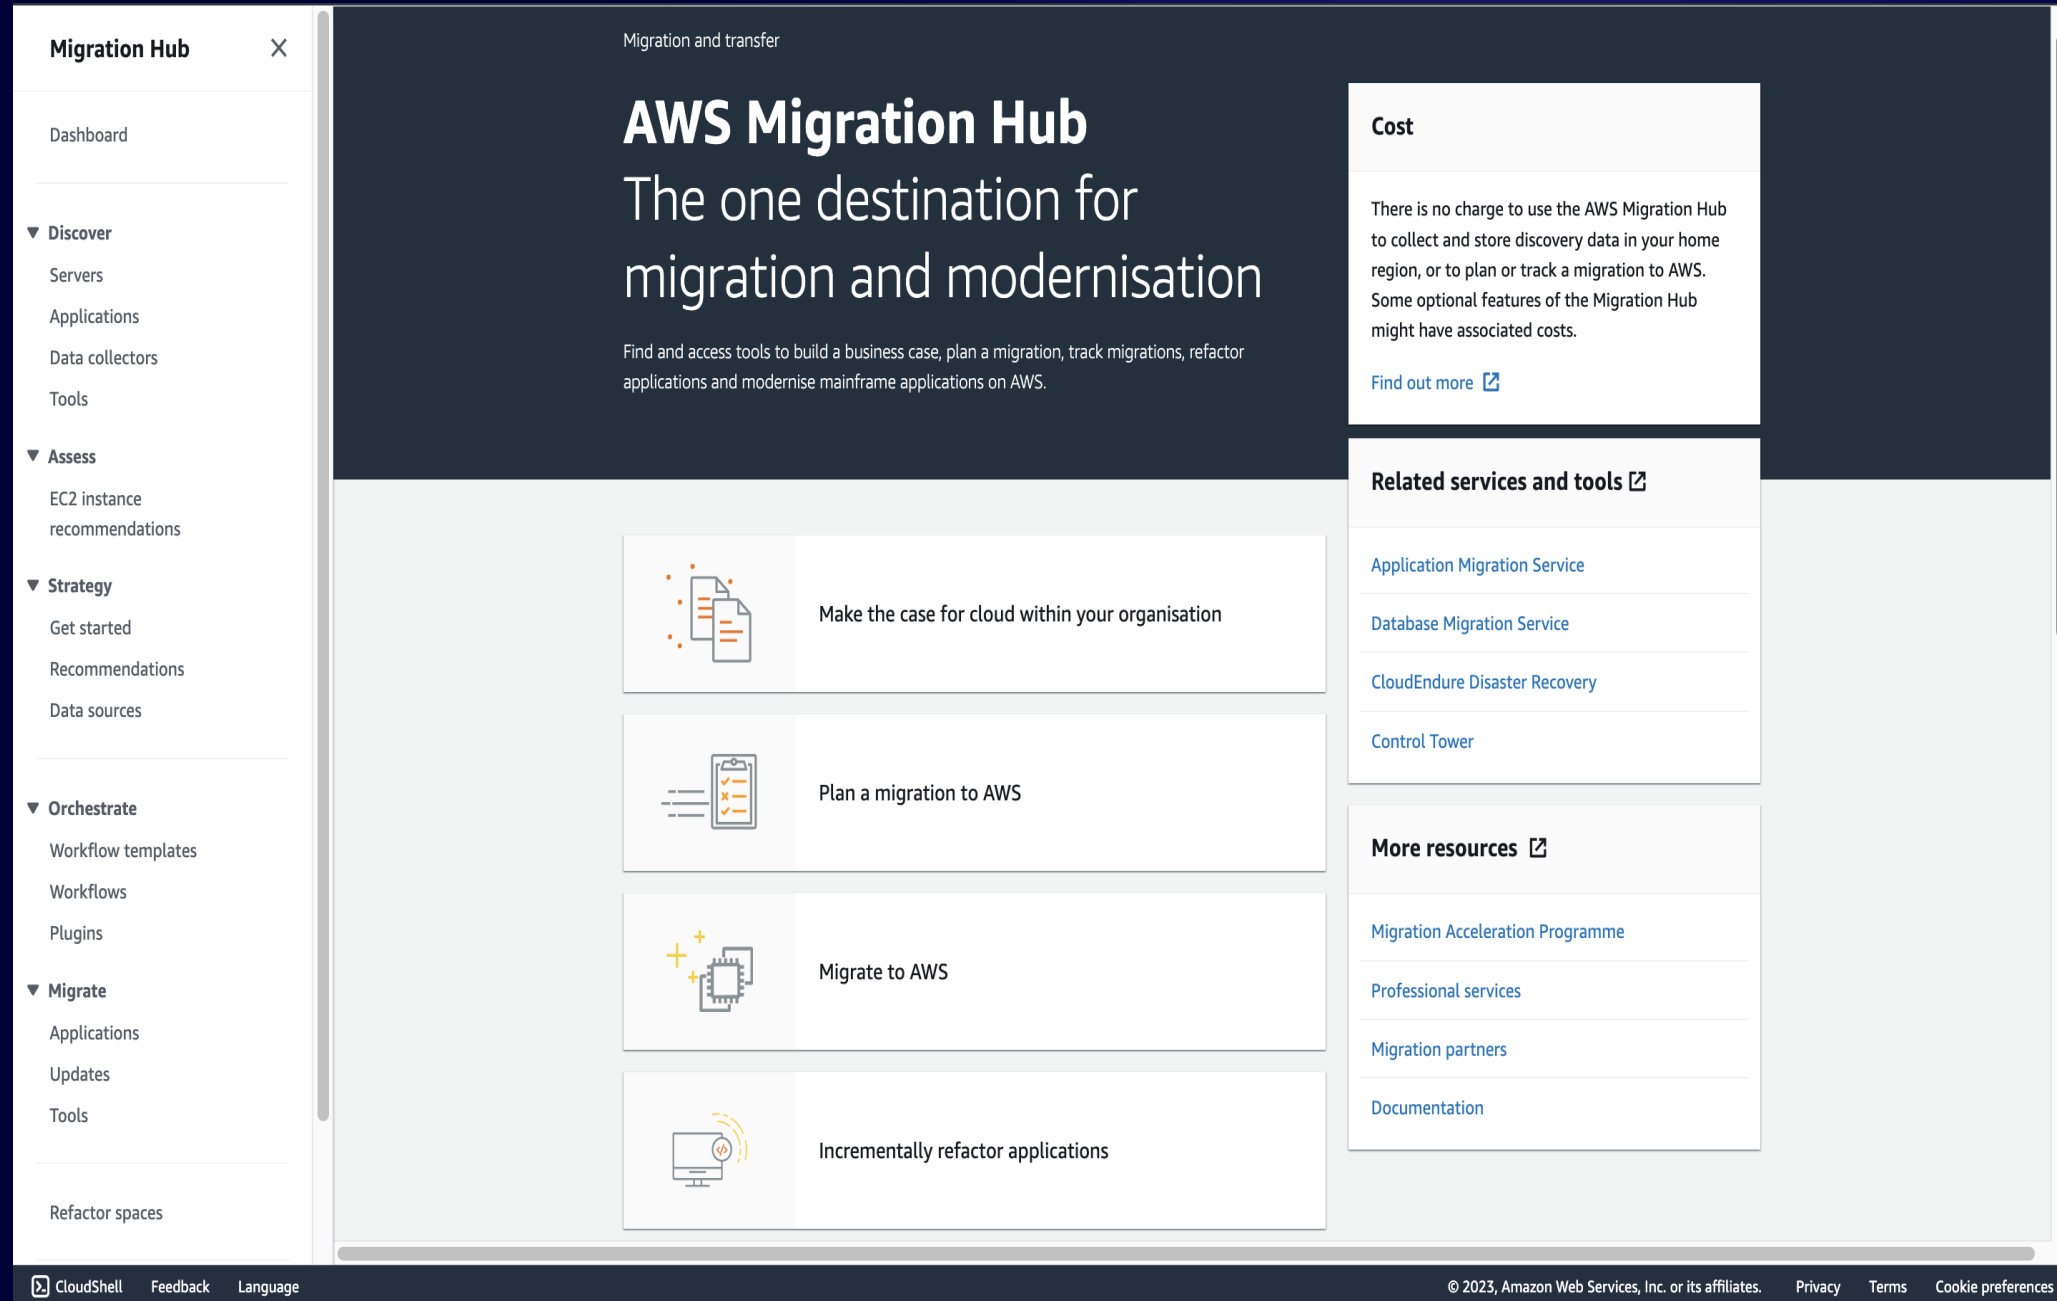

- Import existing server inventory
- Obtain right-sized EC2 recommendations
- Capture and visualize system inventory, performance, and dependencies

Mobilize

- Analyze server performance and identify server dependencies
- Group applications and build a migration plan

Migrate and modernize

- Track application migrations from multiple tools

AWS Migration Hub

- Migration Hub provides a single location to track the progress of application migrations across multiple AWS and partner solutions
- Using Migration Hub allows you to choose the AWS and partner migration tools that best fit your needs, while providing visibility into the status of migrations across your portfolio of applications

Integrated Migration Tools

With SMS, Import VM images from your existing environment to ready-to-use Amazon EC2 instances

AWS Server Migration Service

DMS helps you migrate databases to AWS easily and securely

AWS Database Migration Service

App Mig service Live Migration provides automated migration to AWS from any physical or virtual infrastructure

Application Migration Service

ATAmotion auto-migrates live workloads directly to your VPC from any physical, virtual or cloud source, without installing agents.

RiverMeadow Server Migration SaaS provides high performance and secure workload migrations into AWS VPC environments.

- The migration tools, if authorized, automatically send status updates and results back to Migration Hub, for display on the migration status page for the application.

<input type="checkbox"/>	o-3zf7u2...	wordpress...	Collecting	Running	192.168.1...	2.0.20

Migration Tracking

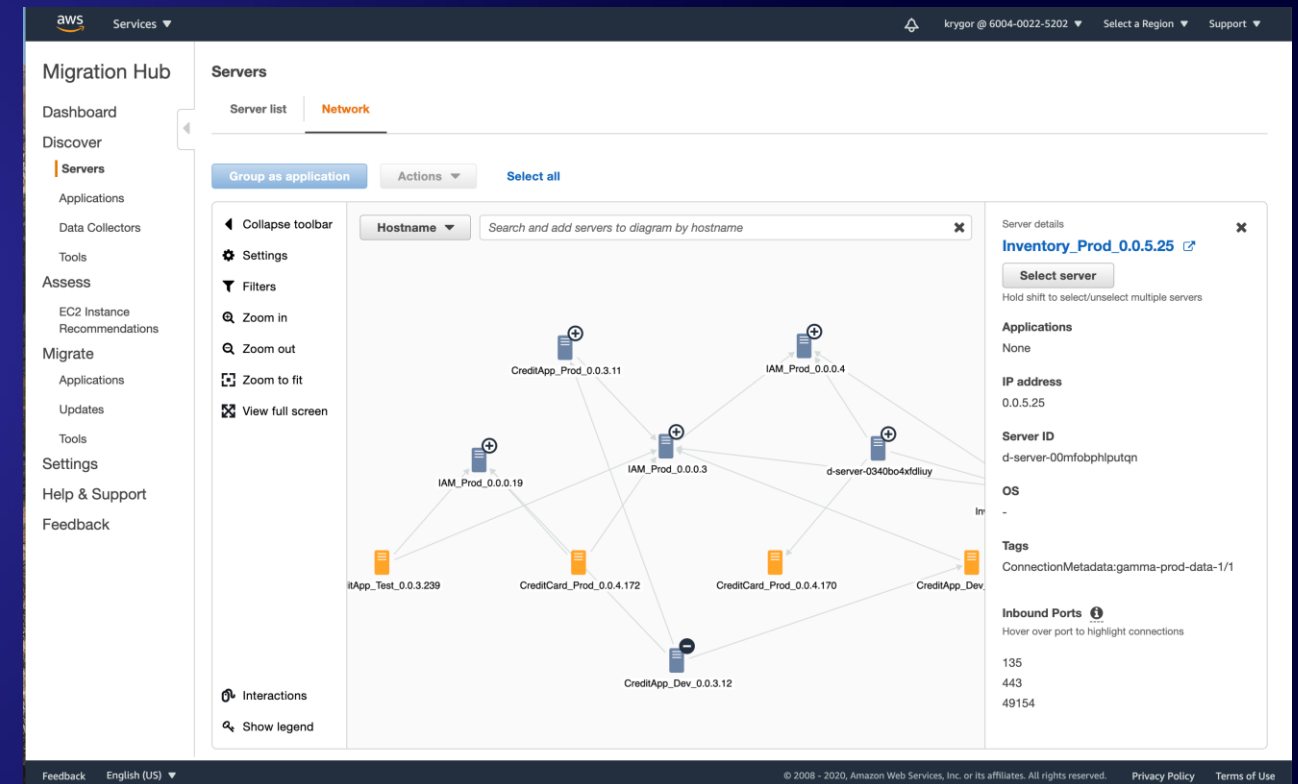

- Track the status and key metrics of your application migrations by checking the Migration Hub Dashboard

Visualize on-premises discovery data in Migration Hub

Migration Hub network visualization (AWS Discovery Agent only)

Accelerate planning by making server discovery data planning-ready

- Visually identify server dependencies
- Identify the role of a server
- Data-driven approach to grouping servers as applications
- Use output to plan migration strategies, build migration waves
- Free to use, reducing migration tooling costs

Demo : Migration Hub

Audience Polls!

Do you plan to use or learn more about today's AWS Service within the next 8 weeks?

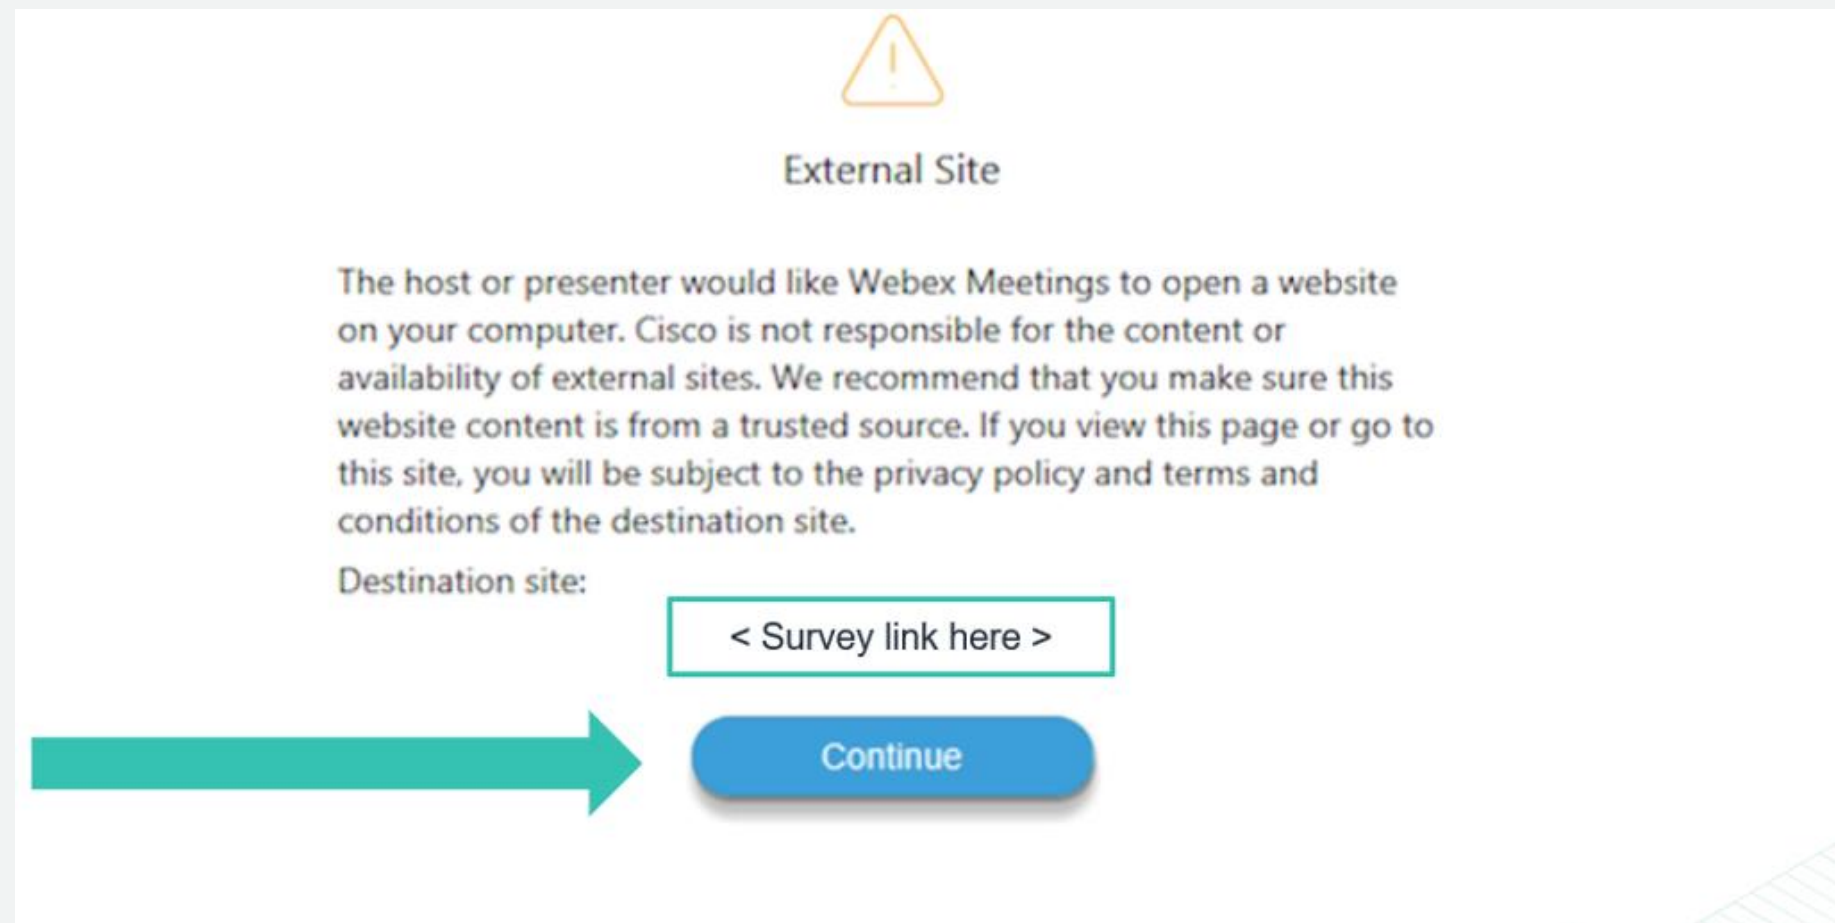

Are you working on a current AWS opportunity?

Would you like AWS Expert to reach out to you regarding a question about a current opportunity?
